PROFESSIONAL SUMMARY

Third-year CSE student at VIT specializing in Information Security, with hands-on experience in LLMs, RAG, Agentic AI, model development, and full-stack engineering. Driven to build intelligent, scalable, and secure systems at the intersection of AI and cybersecurity, with interests in AI research, model development, and security engineering.

PROFESSIONAL EXPERIENCE

AI/ML, Model Training & Full-Stack Engineering Intern, 10X Technologies 08/2026 – Present

- **Contributed to end-to-end AI model development and training**, spanning large-scale data collection, preprocessing, cleaning, synthesis, OCR, and transcription, with hands-on work across **LLM, RAG, ONNX, and GGUF-based workflows**.
- **Built and maintained frontend and backend systems and Designed and refined scalable data-processing pipelines**, streamlining data ingestion, transformation, validation, and processing workflows for reliable AI development.

PROJECTS

Sentinel AI — Cyber Threat Intelligence Platform

- **Built an AI-driven threat intelligence system** that unifies **threat detection, OSINT, phishing analysis, and digital forensics** into a streamlined security investigation workflow.
- **Integrated LLMs, security APIs, and Explainable AI** to transform raw threat indicators into **enriched, contextual, and actionable intelligence**.
- **Tech Stack:** React, Python, FastAPI, LLMs, OSINT APIs, VirusTotal API Live Demo

Spendly — AI-Driven Financial Intelligence & Advisory System

- Engineered a **financial intelligence system** for **Indian families, students, and senior citizens**, integrating budgeting, expense tracking, financial planning, and visual analytics.
- Developed a **AI Financial Advisor and** conversational **chatbot** with **Indian-language support, personalized guidance,** and accessible UI and Themes.
- **Tech Stack:** React, Supabase, OpenRouter API, Framer Motion, Recharts, Vercel. Live Demo

SupportFlow AI — Agentic Customer Support System

- Built a **multi-agent support system** that classifies customer intent and dynamically routes requests across specialized **Sales, Technical, Billing, and Account agents**.
- Implemented **RAG, Supervisor Agent orchestration, conditional routing, and persistent memory** for contextual, multi-step customer interactions.
- **Tech Stack:** LangChain, Multi-Agent AI, RAG, SQLite, Supervisor Agent, Conditional Routing.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java
AI/ML & LLMs:: LLMs, RAG, Fine-Tuning, NLP, AI Agents, Model Development
Frameworks & Libraries: LangChain, LangGraph, Hugging Face, React, Framer Motion, Recharts
Web Technologies: HTML, CSS, JavaScript
Backend & APIs: FastAPI, REST APIs, SQL, Oracle, SQLite, Supabase, OpenRouter, Firebase
Cybersecurity:: OSINT, Threat Intelligence, Security APIs, VirusTotal API
Tools & Deployment:: Git, GitHub, Docker, Vite, Ollama, Vercel, Render, VS Code

EDUCATION

Vellore Institute of Technology, VIT Vellore,
B.TECH in Computer Science Engineering (Information Security) 2024 - 2028
CGPA: 8.27

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Information Security
Sri Chaitanya Junior Kalashala - Higher Secondary | **88%**
Ravindra Bharathi School - Secondary | **10 CGPA**

CERTIFICATIONS

- **IBM Career - Building Agents with Agentic AI:** Verify Credential
- **Infosys - Generative Models for Developers**
- **Infosys - Deep Learning for Developers**
- **IBM SkillsBuild – Cybersecurity Fundamentals:** Verify Credential
- **Infosys - Introduction to Natural Language Processing**
- **Deloitte Cyber Job Simulation:** Verify Credential
- **Cyber Ninjas with Ethical Hacking – IIT Madras (Techobytes Technologies & ChES IIT Madras)**
